# Why choose Kisi for analytics, reports, and compliance?

Actionable insights

- Gain clear visibility into how your facilities are used to drive smarter space planning and utilization.

- Track presence and automate schedules to align with hybrid policies and return-to-office goals.

- Use historical and real-time data to improve space optimization, improve under-utilized areas, and enhance user experience.

Compliance-ready reports

- Automate access audits and uncover policy gaps with scheduled, exportable reports designed for ease of compliance.

- Maintain full visibility into user activity, permissions, and schedules to support internal reviews and external audits.

- Quickly interpret complex access data with configurable reports and visualizations— including access events, floor plans, and hardware status across your spaces.

Custom roles

- Define precise permissions to control access to sensitive data, reporting tools, and administrative settings.

- Assign scoped roles across your organization to support operational efficiency and audit-ready accountability.

- Empower teams to work confidently without overexposing critical controls or sensitive configurations.

Security hardware for reliable data

Kisi Controller Pro 2 **Required**

Control door access with the Kisi Controller. Connect up to 4 access points fitted with any commercial electronic lock per location.

Explore Controller
$850

Kisi Reader Pro 2 **Most popular**

Improve user experience and ensure frictionless entry. Choose between vast keyless entry options, including key cards, fobs, or the most popular touchless access.
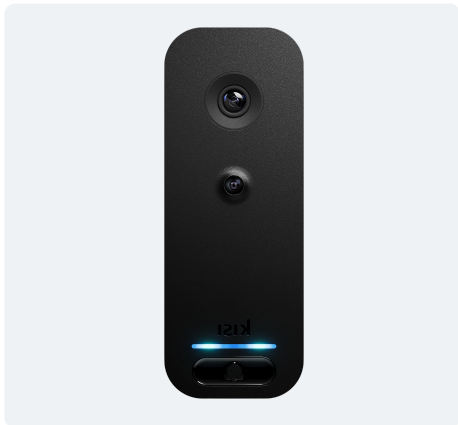

Explore Reader
$475

Kisi Terminal Pro **Optional**

Ensure seamless access experience for both employees and visitors. Expand on the Reader Pro's functionalities by enabling easy visitor access with QR codes.

Explore the Terminal
$850

Kisi Intercom Pro **Optional**

Handle unexpected guests with ease. When the intercom is pressed, you can see who's there, talk to them, and authorize access from the dashboard.
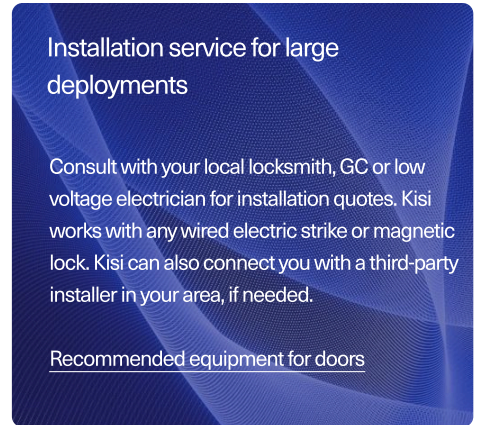

Explore the Intercom
$699

Kisi NFC Credentials **Optional**

Introduce secure access with Kisi's NFC credentials, enable existing RFID credentials like HID, or use mobile access links shareable via SMS.

Explore Credentials
$300/set of 50

Installation service for large deployments

Consult with your local locksmith, GC or low voltage electrician for installation quotes. Kisi works with any wired electric strike or magnetic lock. Kisi can also connect you with a third-party installer in your area, if needed.

Customer stories

KAYAK

[Read case study](#)

KAYAK is the world's leading travel search engine. Processing billions of queries across its platforms each year, it helps millions of travelers around the globe make confident travel decisions.

Before Kisi	After Kisi
• Unwieldy management system operated from an on-premise computer. • Disruptive access and operations with lost and forgotten keycards. • IT and office managers engaged in routine tasks.	• Modern access control system that can be managed remotely from a single pane of glass. • Immaculate user experience where employees unlock doors with their phone they never forget at home. • Automated on- and off-boarding processes and mobile credentials stimulate productivity.

Doctors of BC

[Read case study](#)

Doctors of British Columbia (Doctors of BC)Doctors of BC is a voluntary association of more than 16,000 physicians, residents, and medical students in British Columbia, Canada.

Before Kisi	After Kisi
• The cumbersome access software interface meant a frustrating experience for admins and users and significant time spent performing the simplest operations. • No possibilities for updating the outdated access control software. • Challenging to get relevant data to optimize space utilization.	• User-friendly interface and an access mobile app that is easy and engaging for users and administrators. • Remote management for administrators and integrations with other software Doctors of BC already use. • Relevant access insights for making data-based space utilization decisions.
