Modern security for fitness & wellness businesses

Increase the safety, efficiency, and profitability of your fitness club or wellness center through KisiFit, our all-in-one cloud-based solution.

Enhance security with tailgating detection, reduce operational costs with an intuitive management dashboard and useful integration, and discover new revenue streams through automated and advanced access control.

What you get

Boosted revenue: Attract a broader member base, implement tiered memberships, and automate free trials with modern automated access control.

Prevented loss: Utilize video surveillance and real-time alerts to prevent tailgating and membership fraud, ensuring only authorized members access your facilities.

Streamlined operations: Reduce front-desk staffing needs with self-check-in, automated access control connected to your CRM, and manage multiple locations remotely from a single dashboard.

The power of KisiFit

24/7 access: Extend working hours with no additional staff.

Mobile unlocks: Unlock doors via smartphone or smartwatch.

Automated operations: Sync with CRM systems to manage access, bookings, and payments.

Unmanned space management: Provide secure access to self-service fitness and wellness areas.

Tailgating prevention: Monitor entries with video integration and get real-time alerts.

Centralized dashboard: Control access and security for multiple locations remotely.

Optimized spaces: Introduce dynamic pricing and streamline schedules, maintenance, and operating hours based on activity and usage.

The gains

Per gym

Lift in overall revenue from monetized bookings

10–25%

Lift in lost revenue from tailgating non-members

5–10%

Ideal for

Gyms and fitness studios

Enable 24/7 member access without on-site staff.
Restrict entry based on membership level.
Automate guest passes and trial memberships.

Yoga and pilates studios

Provide touchless, uninterrupted access for scheduled sessions.
Limit access to instructors and registered clients only.
Prevent overcapacity by controlling class entry and capacity.

Golf simulators and specialty training centers

Offer secure, reservation-based access without manual check-ins.
Limit entry to paying customers during their booked time.
Prevent equipment misuse with automated permissions and user logs.

CrossFit and HIIT centers

Secure high-value equipment and prevent unauthorized use.
Allow entry only during scheduled class times.
Track member attendance for analytics and engagement.

Wellness and recovery centers

Manage client access to saunas, therapy rooms, and private spaces.
Offer time-based access for appointments and services.
Integrate with booking systems for automated entry.

Sports and training facilities

Grant flexible access for athletes, trainers, and staff.
Separate entry permissions for different teams or training zones.
Monitor facility usage for security and optimization.
