

The interoperable platform for all your connected, physical spaces

Enable seamless coordination and swift decision-making by overseeing your whole security suite — access control, visitor management, video surveillance, analytics and reporting, and intrusion detection — from a single, intuitive interface.

Centralize your security to simplify operations, reduce the learning curve, and enhance the overall efficiency.

What you get

All-in-one platform: Oversee all security systems from a unified, intuitive dashboard, reducing complexity and administrative overhead

Remote management: Manage security infrastructure in real-time from any location, ensuring prompt incident response and continuous oversight.

Rapid incident response: Quickly identify and respond to security threats with real-time alerts, detailed logs, and automated threat detection solutions, including intrusion detection and tailgating.

Data-driven insights: Utilize customizable reports and dashboards to make informed decisions, optimize space usage and user experience, and enhance security protocols.

Scalability: Easily add devices, users, and locations as your organization grows, with seamless integration into existing workflows.

Streamline with OSP

Access control: Swiftly manage access permissions, users, groups, and entry points.

Video surveillance: Integrate with cameras to monitor access points, prevent tailgating, and resolve incidents.

Visitor management: Automate check-ins, grant temporary access, and ensure compliance with detailed visitor logs.

Intrusion detection: Customize zones, connect alarms, and get instant alerts for potential unauthorized access.

Analytics & reporting: Utilize custom dashboards and tailored reporting for enhanced compliance, security, and space utilization.

The impact

Global

Unlocks

150,000,000

Detected compliance incidents

500,000

Per customer

Time saved on compliance reporting

80%

Cost saved on visitor management

60%

Ideal for

Hybrid and shared workplaces

- Seamless mobile, touchless entry.
- Track occupancy and optimize space usage.
- Automate visitor access, temporary passes, and bookings.

Global corporate offices

- Manage all offices from a unified, intuitive dashboard.
- Automate access permissions, on- and off-boarding.
- Monitor entries, get customized reports, and ensure compliance.

Educational institutions

- Secure campus buildings for staff, students, and visitors.
- Restrict access to labs, libraries, and dorms.
- Lockdown specific rooms or the entire building with a tap.

Retail & hospitality

- Secure storefronts, stockrooms, and offices.
- Track and record foot traffic and analyze security trends.
- Enable scheduled access for deliveries and vendors.

Industrial & warehousing

- Manage access for employees, suppliers, and contractors.
- Reduce unauthorized access to sensitive areas and equipment.
- Monitor and respond to security events in real time.

Healthcare facilities

- Control access to patient areas and storage rooms.
- Comply with security and privacy regulations.
- Streamline visitor movement with temporary access links.
