Benefits for Schools and Campuses

Scheduling

- Easily adapt to and manage changing schedules and access needs. Set preferred open and close times to match campus hours.

Reliable remote system management

- Change access levels, view alerts, and more all through your computer or mobile screen. Share access with anyone, anywhere, anytime.

Emergency readiness

- In the event of a campus threat, immediately lockdown your campus with the click of a button. Kisi's flexibility allows you to quickly lock down specific areas, doors, or the entire campus.

Define access levels by user group

- Create different access levels for students, faculty, visitors, and janitorial staff as needed.

Convenient keyless access

- Create a welcoming and safe community by enabling access through our app, which includes tap-to-unlock or unlock through the mobile app. If physical credentials are needed, choose between cards or keyfobs.

Maintain the highest level of security

- Apply critical security updates automatically over the air.

Stay compliant and up to date

- Easily generate reports from event logs. Swiftly filter and export access events for specific doors, users, or access groups. Define access levels by user group

Useful integrations

Customize Kisi to meet your unique needs with Kisi's library of integrations. Automatically set access levels upon student enrollment, integrate Kisi with your CCTV system to see what is happening and where, incorporate alarm monitoring functionality to alert authorities if a threat is present, log and track campus visitors, and more.
