# Manage your recreational and municipality facilities efficiently with Kisi

Accommodate community access needs with streamlined access management. Through our user-friendly access control solution, you can enhance safety, boost community engagement, and operate more efficiently.

Why Kisi?

Kisi is a secure, user-friendly access control system that integrates seamlessly with your current infrastructure.

Benefits

Centralized access management

- Manage all facilities remotely from a single dashboard.
- Save time with automatic over-the-air software updates to ensure you always stay compliant.
- Never worry about being offline, as the system will maintain power and connectivity.

More control

- Manage all facilities and employees in your city directory through one dashboard.
- Grant and restrict access rights, set access schedules, and synchronize access with your event calendar to keep specific doors open during events.
- Automate access schedules for seasonal workers and facilities.

Flexible access

- Integrate with your current access hardware and software, including badge readers, security cameras, and management systems.
- Utilize different access methods to meet the needs of your community, including mobile devices or key fobs/cards.
- Remotely unlock doors or put specific doors and areas into lockdown.

Useful integrations

Customize Kisi to meet your unique needs with our library of integrations. Kisi integrates with thousands of leading software providers, including Microsoft, Google, RecDesk, Envoy, Okta, Omnify, and RecTrac.

Minimize security threats and keep up-to-date with staff changes by connecting Kisi with SCIM. Use Kisi with your preferred SSO provider to simplify user management and compliance audits. Integrate security cameras, data analytics tools, visitor systems, and government software to enjoy more control with less manual overhead.
