

Operational savings with access control

The average 100 employee company can save: **782** hours per year of operational overhead.

That's more than **97** working days or almost **5** months' salaries, which usually equals **\$13,000**.

Every locked space can be monetized.

Companies can save **\$100** per person in the first year. After the first year, *the savings grow as the company scales, and only the software costs remain.*

Operational savings with access control

Modern access control can open up *additional revenue streams*, especially for membership businesses like coworking spaces and gyms.

Additional per year
\$24,000+ per locked door
\$13,000+ per extended working hour
\$5,000+ by assuring only paying members enter
\$9,000+ a year from day passes

Every locked space can be monetized.
