

Give eyes to your doors

kisi

This integration allows you to create the ultimate security setup for your facility. Get to know who enters your space when, and get alerted about every security event on all devices.

Get visual

Next-level security

Enable your admins to review events quicker, and validate who comes through the door with enriched video images.

Solving complex issues

Investigate tailgating situations in order to solve the problem.

Get visual

Streamline activity logs and audits with visual snapshots. Admins will be notified in the case of unusual situations (like a non-authorized access attempt).

The future of access

Centralized engine

No need to jump from your access control dashboard to your video surveillance software. Kisi allows you to have footage and controls in one place.

Secure your space

Only allow staff to enter determined areas of your space (e.g., storage room or staff office)

Easy check-in

Use our solution as a check-in point for your customers. You will discover new insights about occupancy and space utilization.
