

Modern security and automation for your fitness & wellness studio

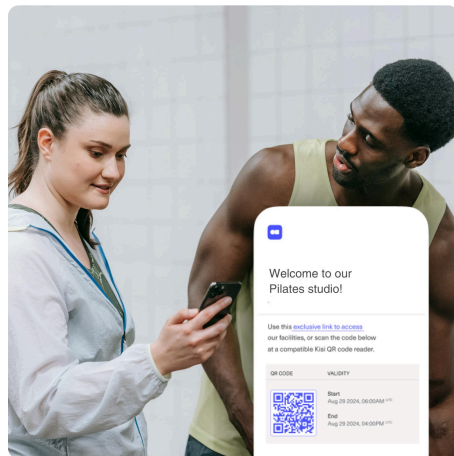

Streamline check-ins, protect members-only spaces, and connect booking to entry. Members can access the studio using their phone, with no key fobs, no queues, and no class disruptions, even during unstaffed hours.

With the Kisi x bsport integration, access syncs automatically with bookings and memberships, reducing manual work so your team can focus on delivering a seamless, elevated member experience.

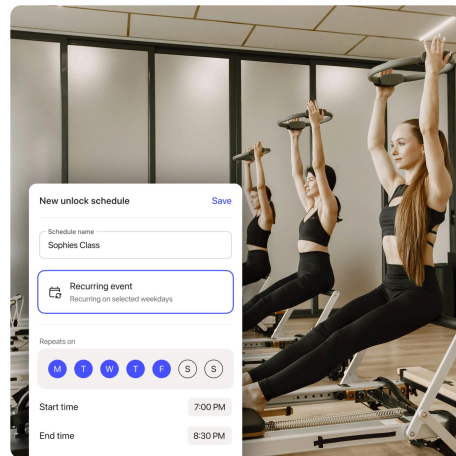

What you get

A seamless, mobile-first member experience: Give your clients a smooth, high-end journey from booking to arrival. Members unlock the studio using their phone, with no key fobs, no queues, and no interruptions, creating a more premium and consistent experience that supports retention.

A secure, members-only environment: Keep your space private and controlled with access tied directly to bookings and memberships. Only active members and booked clients can enter, helping you maintain a calm, professional studio experience.

Smarter operations and protected revenue: Automate access based on bookings and memberships to reduce manual work and front desk pressure. Access updates automatically when memberships change or payments lapse, so you stay in control, avoid revenue leakage, and can confidently run extended or unstaffed hours.

The potential

£5K– £15K/month

From running additional unstaffed sessions

£3K– £8K/year

Saved on keycards, replacements, and manual admin

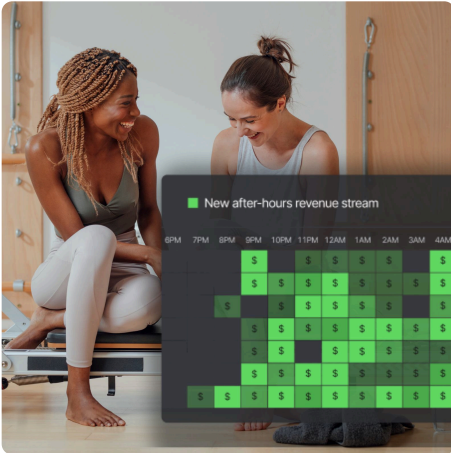

+5–10% higher retention

From a smoother, uninterrupted member experience

£1K– £3K/month

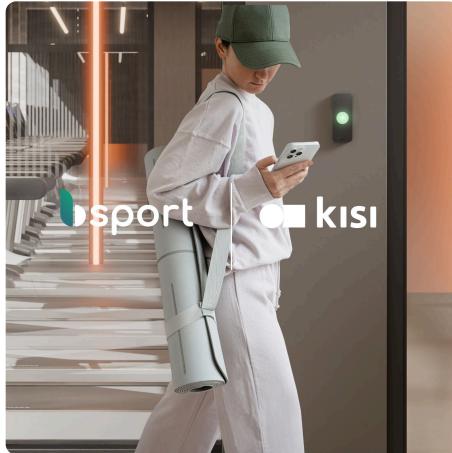

Protected by automatically restricting access after lapsed payments

The power of Kisi x bsport

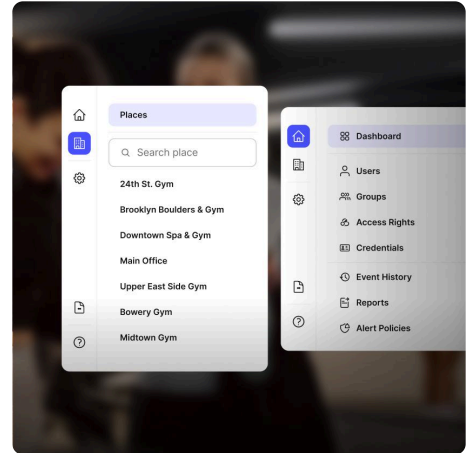

Run your studio during unstaffed hours: Offer early and late classes without staff on-site, with full control over access.

Protect your revenue automatically: Update access instantly when memberships change or payments lapse.

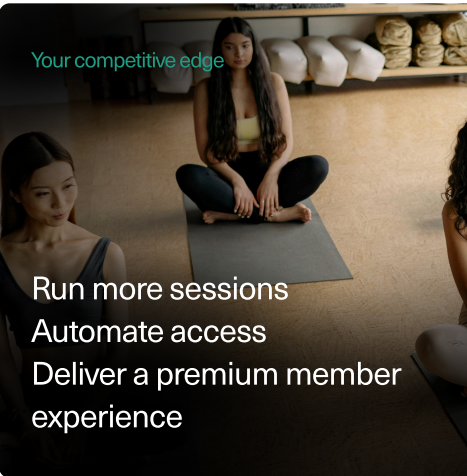

Focus on your members, not the front desk: Automate check-ins and entry so your team can stay present and avoid class interruptions.

Access synced with bookings: Prevent unauthorized access and keep entry limited to active, booked members

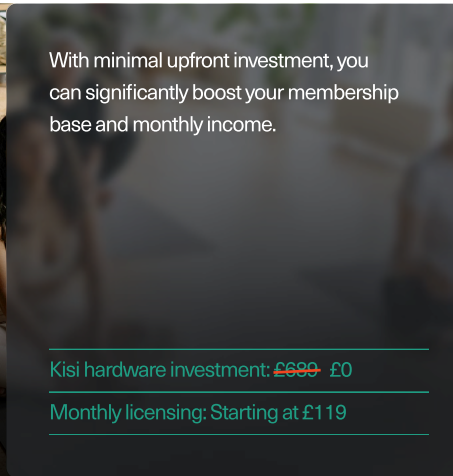

Manage all your locations with ease: Control access across one or multiple studios remotely from a single dashboard.

One app member experience: Let members book classes and unlock the studio directly through the bsport app.

Your competitive edge

Run more sessions
Automate access
Deliver a premium member experience

With minimal upfront investment, you can significantly boost your membership base and monthly income.
