

Kisi Management Software

Always keep track of the data that matters most to your facilities' security, and control access permissions with our award-winning solution.

Kisi's advanced access management dashboard allows you to view and manage your facilities, so you can easily grant access permissions and view user activity. Keep your spaces compliant and secure with the help of powerful data insights.

Benefits

- See detailed overviews of user activity
- Access data insights to help you optimize space utilization and manage capacities
- Easily manage user permissions and access
- Monitor access events in your facilities in real-time
- Manage multiple facilities from a single dashboard

Features and capabilities

Intrusion detection

Stay notified of any policy violations with alerts sent directly to you.

Place-wide lockdown

Prevent entry or exit of any Kisi-enabled door when your space needs additional protection.

Recall all event history

See every Kisi-related access event and replay associated media footage.

Capacity management

Watch over the capacity of your spaces using data insights, and set up alert policies to ensure compliance.

Audit and reporting

View access logs and historical data for your spaces so that you can track the metrics that matter most to your security.

Create access schedules & manage users

Keep a door locked or unlocked during a defined time period or during holidays. Add, remove, and delete users, and enable/disable access with ease. Use SSO & SCIM integration for automatic provisioning.
