

Self check-in

Badge printing

Visitor logging

Unmanned front desk

A complete, out-of-the-box visitor management solution.

Kisi Visitor Station is everything you need to run a self-service front desk, in one bundle. Visitors walk in, register their details on the kiosk, and walk away with a printed badge. No receptionist needed, no complicated setup, no missing parts.

It's the fastest way to bring structure, security, and a great first impression to any entrance, whether you're running a corporate office, a coworking space, a gym, or any facility that receives regular visitors.

Self-service from start to finish

You enable visitors to check themselves in quickly using the Kisi Kiosk Pro, where they enter their details and receive a printed badge in just a few steps. The experience is smooth and easy to follow, even for first-time users. You reduce wait times and remove manual effort while ensuring every check-in is recorded automatically.

A complete setup, ready to deploy.

You get everything you need in one bundle: the kiosk, label printer, stand, and label rolls, all designed to work together seamlessly. You don't have to source parts or worry about compatibility, which makes deployment simple and predictable. Once the device is enrolled, you have a fully functional kiosk ready to handle your visitor workflows right away.

Full visibility, every visit.

You automatically capture every check-in in the Kisi dashboard, giving you a clear and structured record of each visit. You can see who arrived, when they checked in, and who they came to meet without relying on manual logs. This gives you better accountability, stronger compliance, and complete confidence in how visitors move through your space.

What's in the box

Kisi Kiosk Pro
Samsung Galaxy Tab A11+ tablet with the holder and stand

Brother QL-820NWBC
Wireless label printer for instant badge printing

DK-22205 Label Roll
Pre-loaded label roll for visitor badges

How it works

- Visitor arrives at the entrance and approaches the Kisi Kiosk Pro
- They self-register, entering their name, selecting their host, and providing a reason for their visit
- A badge is printed instantly by the Brother QL-820NWBC, containing a QR code for door access
- The visitor scans their badge QR code at a Kisi Terminal Pro to access permitted areas
- The visit is logged automatically in the Kisi dashboard with a full timestamp
