

All-in-one door access control that scales with your needs

Access Control Cockpit

- *Global management in the cloud*

Upgrade to the cloud to operate all your spaces remotely via the intuitive Kisi dashboard. Empower your admins to grant and revoke access to single users or groups, set lock schedules, and even initiate remote lockdowns.

Flexible Access Methods

- *Option to unlock with phone, watch or the wave of a hand — or use cards and fobs*

Kisi interfaces with a wide variety of access standards, giving you plenty of options to choose from. Whether you want to stick to your legacy keycards or let users unlock with their smartphones, Kisi lets you choose what works best for your business.

Tailored Migration

- *Use Kisi readers or bring your own, leverage existing electric locks and wiring*

Make the most out of your existing system with our backward compatibility. Migrate to the cloud while keeping your existing wiring, readers, and credentials. Increase your security and decrease maintenance costs at your pace.
