

# Kisi: the access system for the hybrid workplace

Stay in control, *even remotely*

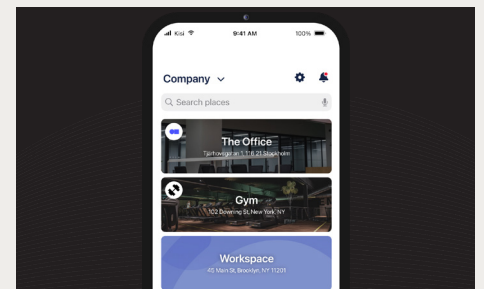

## Remote access sharing

Grant or revoke access to any area remotely and leverage access groups and integrations.

## Remote unlocks

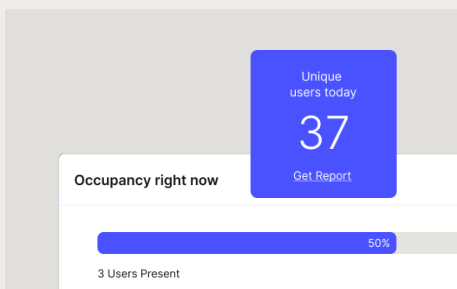

Unlock any door from wherever you are via the Kisi app or web dashboard.

## Multi-location management

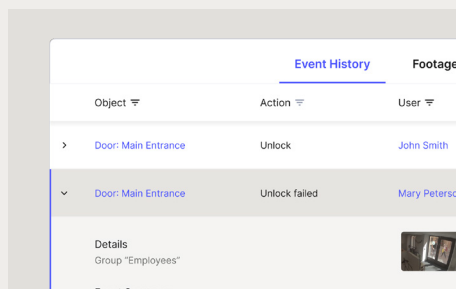

Remotely manage unlimited places from a single dashboard.

## Manage capacity and *protect your space*

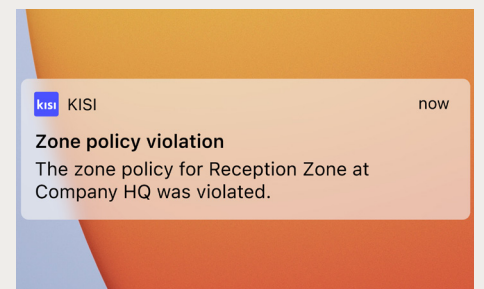

## Capacity management

Set capacity limits, get alerts when your space is reaching full capacity and gain insightful metrics for access behavior.

## Events and analytics

Review and export events for incident investigation, space utilization insights, safety, or compliance.

## Intrusion alerts

Set alarm zones, customize your policies and trigger an alarm when an intrusion event takes place.
