

# Leverage the power of the Kisi API

Read the API documentation

[api.kisi.io/docs](https://api.kisi.io/docs)

The Kisi API allows developers and technology partners to seamlessly build advanced solutions on top of the Kisi platform.

```
import Kisi from "kisi-client"

const kisiClient = new Kisi()

{
  "user": {
    "name": "First Last",
    "email": "email@example.com",
    "password": "test1234",
    "terms_and_conditions": true
  }
}

const place = {
  name: "Kisi Headquarters",
  address: "45 Main Street, New York City 11201 USA" { place }}
```

*"Kisi's API documentation is so clear that we had our beta version up and running in 24 hours."*

Nigel Thomas,  
CEO, GoLocker

Some of the products our customers built with the Kisi API
